Applicant Analysis/ First-Year Enrollment

Dental Hygiene

1981/82

SUPPLEMENT 3
TO THE
ANNUAL REPORT 1981/82
DENTAL AUXILIARY EDUCATION

This report, Applicant Analysis/First-Year Enrollment--Dental Hygiene, 1981-82, contains information gathered in The Annual Survey on Dental Auxiliary Education Programs, 1981-82. The information reported here is divided as follows:

Table 1	Admission policies
Table 2	Applicant and first-year enrollment data
Table 3	Criteria used in admission process
Table 4	Programs that accept out-of-state or out-of-district students
Table 5	Programs with provisions for advanced placement
Table 6	Level of education of students entering first-year

In 1981-82, 207 students without minimum requirements were admitted to dental hygiene programs (Table 1).

The total first-year enrollment in 1981-82 was 5,386. One hundred eighty-three men and 18,405 women applied to dental hygiene programs. Of the applications made by men, 47.5% met minimum requirements for admission, while 61.2% of the applications from women met minimum requirements. Since not all schools reported this information about their applicants, these percentages are based on only those applicants for whom such information was reported (Table 2).

Six hundred twenty-nine out-of-state applicants and 740 out-of district applicants were accepted into dental hygiene programs (Table 4). One Hundred seventy programs reported provisions for advanced placement. The number of students admitted with advanced placement for 1981-82 was 1,162 (Table 5).

The level of education students entering the first year of a dental hygiene program is as follows: 26% of the students had earned a high school diploma; 28.6% had finished one year of college; while 3.6% had earned an associate degree and 27.8% had completed 2 years of college. First-year students having completed three or four years of college comprised 9.3% of the reported students; and 2.3% had earned a baccalaureate degree. Under 2.3% had other educational levels.
